

Contemporary Reinvention

Herman Miller, in collaboration with Danish design brand HAY, have come together for the Herman Miller x HAY Collection—a 21st-century reinterpretation of eight beloved Eames mid-century classics. Featuring new, inspired colour palettes and updated materials, the collection is a powerful combination of original, timeless design with a contemporary point of view. hermanmiller.com

Functional Fun

The Tizio desk lamp by Richard Sapper, for Artemide, celebrates its 50th anniversary and despite being designed half a century ago, it is still highly contemporary and elegant. A designer's dream lamp, the Tizio is an adjustable table fixture that can be moved in four directions.

Table It

Punto is a series of tables from Wriver, with pointed tentacle like tri-legged base with table-tops that come in a variety of materials and finishes. We love how versatile they are as multiple space-specific combinations can be created, forming clusters with the set of tables in different heights. wriver.in
